Justin Ratley

Senior Bioinformatics Scientist | Computational Biology, Genomics Data Pipelines & Software Engineering
United States

Summary

I’ve always been driven by a simple core belief: the best software solutions happen at the intersection of deep domain knowledge and thoughtful engineering. I’ve specialized in taking complex, highly specialized data—whether in life sciences, advanced mathematics, or large-scale financial platforms—and building the robust systems needed to translate that data into real-world impact.My technical foundation is rooted in hands-on full-stack development, distributed architectures, and scalable cloud solutions. Throughout my journey, I’ve had the opportunity to build mission-critical applications across both healthcare and finance industries. From engineering health system infrastructure at BayCare and powering fintech solutions at Frost, to developing enterprise systems at GlobalLogic and leading complex AI-driven data pipelines at Tempus AI, I focus on building reliable, secure, and user-centric systems.Beyond pure code, what sets my approach apart is a strong background in mathematics and genetics. Whether its applying statistical modeling to complex algorithm design or understanding the intricate biological frameworks behind healthtech and genomic platforms, I bridge the gap between technical teams, domain experts, and business outcomes.I’m always eager to collaborate with passionate teams, solve challenging multi-disciplinary problems, and build technology that scales. Feel free to connect or reach out if you'd like to chat about tech, data-driven engineering, or building impactful software!

Experience

Tempus AI
Senior Bioinformatics Scientist
January 2024 - Present (2 years 10 months)

GlobalLogic
Bioinformatics Software Developer
October 2021 - December 2023 (2 years 3 months)

United States

Frost
Business Intelligence Analyst
February 2018 - September 2021 (3 years 8 months)
United States

BayCare Health System
Software Engineer
May 2015 - January 2018 (2 years 9 months)

Education

Texas Tech University
Doctor of Philosophy, Biology (Genetics & Genomics) · (2021 - 2026)

Texas Tech University
Master of Science, Mathematics · (2016 - 2019)

Texas Tech University
Bachelor of Science · (September 2011 - April 2015)
